For Volvo vehicles with 2.4 l diesel engines, the EGR valve consists of two components: the electronics unit and the valve body.

As with Volvo components, the electronics unit and valve body of the EGR valve supplied by Motor Service can only be delivered individually.

The electronics unit 7.00555.07.0 fits both valve bodies 7.00555.06.0 and 7.01604.02.0.

Guides on the side ensure that the electronics unit and valve body lock together securely.

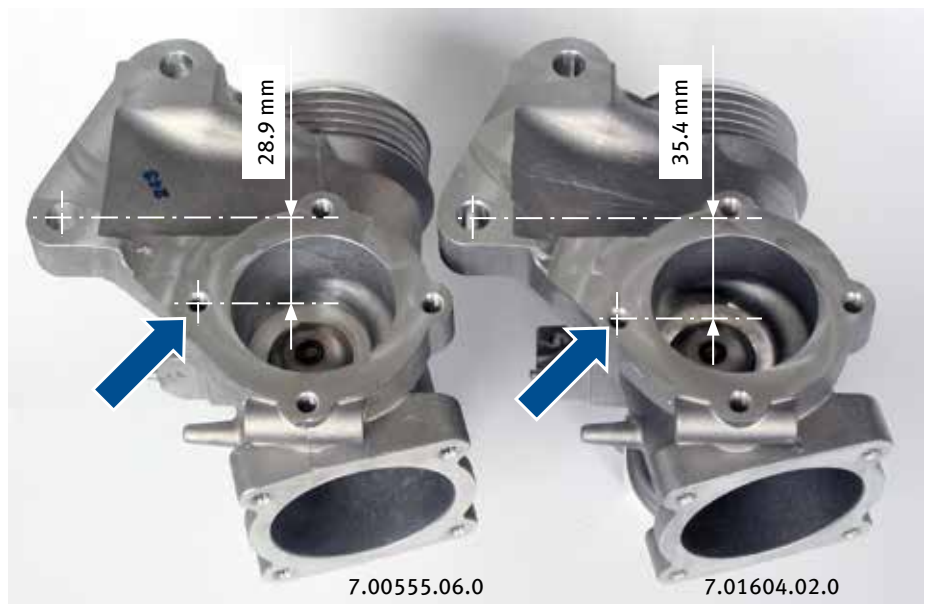

Assembly instructions and a set of screws are provided with the electronics unit.
 Tightening torques: 3.7 Nm – 0.2 Nm

 **Note:**

When placing orders for Volvo C30/C70/S40/V50 models, please specify the exact engine type and any possible delineation by chassis number, engine code and year of manufacture.

The two valve bodies only differ in the varying position of a tapped hole (see image).

The right of changes and deviating pictures is reserved. For assignment and replacement parts, refer to the current catalogues, TecDoc CD or respective systems based on TecDoc.
