to fit

Mercedes A124, 208 / C124, 208 / S124, 202 / W124, 201, 202

Leakage of hydro fluid due to high dynamic strain and small bonding surface

Hydro mount replaced by an optimised full-rubber mount with a larger bonding surface

- Rattling from the rear axle and an overall decline of the handling of the vehicle
- Reduced driving comfort

Advantage

No leakage possible and significant longer lifetime without restriction of driving comfort
